CV 5101
Modeling, Uncertainty, and Data for Engineers

(July – Nov 2026)

Dr. Prakash S Badal

Flow

- Module Outline
- Motivation
- Introduction

Why should you care about Risk & Reliability?

- Space Shuttle *Challenger* disaster (1986)
  https://www.youtube.com/watch?v=yibNEcn-4yQ

Catch-all approach:

Build for every "what if" scenario: create backup for every imaginable scenario, even wildly unlikely ones

What could go wrong with this approach?

Why should you care about Risk & Reliability?

- Space Shuttle *Challenger* disaster (1986) https://www.youtube.com/watch?v=yibNEcn-4yQ

Catch-all approach:

Build for every "what if" scenario: create backup for every imaginable scenario, even wildly unlikely ones

Spreads engineers too thin: divided resources, real threats do not get the focus they need
Illusion of safety: looks thorough on paper, but critical risks can slip through because everything is treated as equally important

Questions, comments, or concerns?
